

DIRECT ACCESS TO ILZSG's WORLD-CLASS STATISTICAL DATABASES NOW AVAILABLE

ILZSG Monthly Lead and Zinc Statistical Bulletin

First published in 1960 and the basis for much of the research and analysis undertaken on the lead and zinc markets around the globe, this publication provides subscribers with a detailed and comprehensive statistical overview of the fundamentals of lead and zinc supply and demand. Monthly data is provided on a country by country basis for lead and zinc mine production, primary and secondary metal production and metal usage. Trade data and information on LME, SHFE, producers and consumer stocks together with LME prices is also listed as are summary pages with quarterly global market balance calculations.

ILZSG Monthly Data Spreadsheet

The Monthly Data Spreadsheet is updated and made available every month on the Group's website, together with each Bulletin. It includes the most up to date key facts for lead and zinc, and extended monthly series of mine production, primary and secondary metal production and metal usage, by country, for both metals.

ILZSG Interactive Statistical Database

The user friendly ILZSG interactive lead and zinc statistical interface is located in the statistics section of the ILZSG website (www.ilzsg.org). The service provides subscribers with direct access to the extensive records held in the ILZSG statistical database. Information available and system advantages include:

- detailed country by country mine output, metal output and metal usage back to 1960
- primary and secondary breakdown for metal production
- detailed mine and metal trade data with partner countries
- stocks and prices series back to 1960
- data available in both monthly and annual series
- ability to export information to Excel and pdf files
- current information that is continuously updated
