WORLD DIRECTORY: CONTINUOUS GALVANIZING LINES 2022

The fifth edition of this comprehensive ILZSG report last published five years ago, provides fully updated and detailed listings of continuous steel sheet/strip galvanizing lines throughout all regions of the world, including an extensive listing for China.

The two processes used for continuous galvanizing are hot-dip and electrolytic. Each has its own advantages and disadvantages and the choice of process is mainly dependent on the ultimate end-use. Details on these processes, the various coatings used, such as Galvalume and Galfan, and recent galvanizing trends are discussed.

The Directory listings are divided into two sections:

- ❖ **Part I** gives details of continuous hot-dip galvanizing plants – over 500 in 73 countries are listed.
- ❖ **Part II** cover existing electrogalvanizing plants. Over 90 lines in 31 countries are listed.

The following information, when available, is given for each entry:

- ✓ Company address, telephone and fax numbers, e-mail and web addresses
- ✓ Plant location(s)
- ✓ Year plant was commissioned
- ✓ Number and width of lines
- ✓ Type of coating
- ✓ Annual production capacities
- ✓ Approximate zinc usage

CONTENTS

	Page
Introduction	4
Galvanizing Processes	6
1. Hot-Dip Galvanizing	6
1a. Galvanneal Process	7
1b. Galvalume	7
1c. Galfan	7
1d. Zn-Al-Mg Coatings	7
2. Electrolytic Galvanizing	8
2a. Electrolytic Zinc-Nickel Coated Steel	8
Part I: Continuous Hot-Dip Galvanizing Lines	9
Part II: Continuous Electro Galvanizing Lines	90
Country Index	108
