## Lead and Zinc: End Use Industry Statistical Supplement 2009-2018

**2020 Edition**

Developments in industries including the automotive, battery, steel, construction and household appliance sectors have a significant impact on the demand for lead and zinc. The International Lead and Zinc Study Group has produced a detailed report on trends in these end-use markets as a supplement to its regular statistical output. Producers and analysts will be able to use this report to compare trends in lead and zinc usage with those in the main lead and zinc end use industries. The report also helps to identify sectors and regions with the greatest potential for lead and zinc demand growth.

The available data covering the ten-year period 2009-2018 is clearly presented in a total of 21 tables with graphical representations highlighting selected features provided throughout the report.

The publication covers the world automotive industry and includes comprehensive details on vehicles produced, registered and in use for both the car and commercial vehicle sectors as well as battery shipments in the US and Japanese markets. Information is presented on the construction sector, both for dwellings and non-residential buildings, the galvanizing of steel sheet worldwide, general galvanizing in Europe and the production of kitchen appliances. Data on brass production in major markets is also listed.

Economic and social statistics including national population levels are provided for comparative purposes as well as annual GDP growth by country and industrial production indices for both total and manufacturing industries. In addition, details of historic oil price levels are included.

List of Figures	4
Introduction	5
List of Sources	5
Population	6
Gross Domestic Product	11
Industrial Production Index	16
Industrial Production Index for Manufacturing Industry	20
Oil Prices	24
Vehicle Production – Cars	25
Vehicle Production – Commercial Vehicles	26
New Vehicle Registrations – Cars	28
New Vehicle Registrations – Commercial Vehicles	31
Vehicles in Use – Cars	35
Vehicles in Use – Commercial Vehicles	38
Automotive Battery Shipments	42
Construction of New Dwellings	43
Construction of Non-Residential Buildings	46
Galvanized Steel Sheet Production	48
Zinc Use in General Galvanizing	50
Production of Refrigerators for Household Use	51
Production of Refrigerators for Industrial Use	52
Production of Washing and Drying Machines for Household Use	53
Production of Air Conditioning Machines	54
Brass Production	55
