International Lead And Zinc Study Group -ILZSG

OVERVIEW OF ZINC MINING IN BRAZIL

Thiers Lima
Mineral Resources Specialist
Deputy Coordinator for Mineral Economics Studies
National Mining Agency (ANM) - Brazil

ANM

Lisbon, October 15, 2026

OUTLINE

ANM

01 Brazil and Brazilian Mining in Numbers
02 Institutional Framework and Geological Mapping
03 National Mining Agency (ANM) and Legal Mining Regime for Zinc
04 ANM Geosystems and Mineral Economy Platforms
05 Major Mines in Brazil
06 Zinc Exploration: Mining Rights, Investments and Projects (Greenfield)
07 Zinc Mining Concessions, Investments and Projects (Brownfield)
08 Geology, Resources and Reserves of the Main Zinc Mines
09 Zinc Production: Value, Ore, Processed and Historical Output
10 Zinc Mining Royalties (CFEM)
11 Zinc Foreign Trade: Exports and Imports
12 Public Policies for Mining and Critical Minerals

BRAZIL IN NUMBERS

(2025)

Population: 214.2 million

Official language: Portuguese

Currency: Brazilian Real (BRL – R$)

Capital: Brasília

Area: 8.51 million km²

Number of States: 26 states + Federal District

GDP: USD 2.28 trillion in 2025

11th largest economy worldwide

Exports: US$ 348.3 billion

Imports: US$ 280.2 billion

Main economic sectors

Services

Industry (includes mining)

Agriculture

www.gov.br/anm

ANM

BRAZILIAN MINING IN NUMBERS

2025

More than 50 minerals

Approximately 10,000 mines

USD 1.41 Bi
mining royalties (CFEM)

USD 55.4 Bi
Brazil´s Mineral Production Value

~2,3%
of Brazil's GDP

228K
direct jobs
+ 2M indirect jobs

USD 8 Bi
Exploration and Mining Investments

USD 70.3 Bi
in export 2025
(includes Mining Industry and Mineral Processing and Manufacturing Industry)

ANM
www.gov.br/anm

BRAZILIAN MINING INDUSTRY

COMPETITIVE ADVANTAGES

NATURAL RESOURCES ABUNDANCE

GEOLOGICAL DIVERSITY

WATER ABUNDANCE

CLEAN AND RENEWABLE ENERGY

GROWING INFRASTRUCTURE

STRONG LEGAL SYSTEM + STABILITY OF CONTRACTS

SKILLED WORKFORCE

LARGEST ECONOMY IN LATIN AMERICA

REGULATORY BEST PRACTICES

POLITICAL STABILITY

ANM
www.gov.br/anm

INSTITUTIONAL FRAMEWORK OF THE MINING SECTOR IN BRAZIL

Ministry of Mining and Energy (MME)

iat of Geology, Mining and Mineral Transformation (SGM)

Implement policies for geology, mining and mineral processing; Coordinate sectoral planning studies and propose actions for sustainable development of mining and mineral transformation

Geological Survey of Brazil (SGB)

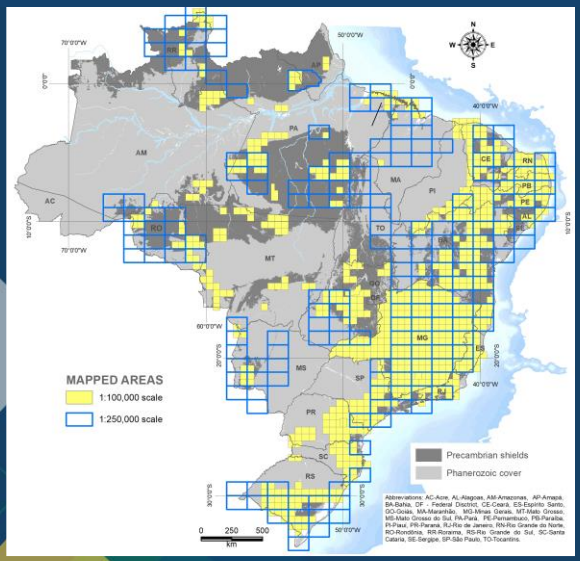
National Mining Agency (ANM)

Promote and disseminate geological knowledge of the country

Manage the mineral resources of the Union, as wel as the regulation and supervision of activies for the use of mineral resources in the country

ANM
www.gov.br/anm

GEOLOGICAL MAPPING COVERAGE IN BRAZIL (1969–2025)



Historically, systematic geological mapping in Brazil has prioritized the 1:250,000 and 1:100,000 scales.

1:250,000 : is essential for regions with limited geological knowledge, specialy in vast and remote areas such as the Amazon.

1:100,000: is the minimum scale required for the assessment of mineral potential and for supporting mineral studies of geological targets of interest.

2025, geological mapping coverage indicates:

- 1:250,000 scale: ~50% Brazil, 70% Precambrian Shields
- 1:100,000 scale: ~28% Brazil, 44% Precambrian Shields

PlanGeo 2025–2034: the Decennial Plan for Geological Mapping - defines guidelines for the ten-year planning of geological mapping and mineral resource investigations to be carried out by the Geological Survey of Brazil (SGB).

Source: SGB (Costa et al, 2026): View of Decennial plan for geological mapping (PlanGeo 2025-2034): Geoscience as a driver of Public Policy through the Geological Survey of Brazil

THE NATIONAL MINING AGENCY

BOARD OF DIRECTORS

ANM operates across all of Brazil:
24 regional offices

SPECIALIZED/TECHNICAL SUPERINTENDENCIES

- MINING TITLES GRANTING
- INSPECTIONS
- MINING REVENUE COLLECTION AND OVERSIGHT
- MINING DAMS SAFETY
- ECONOMIC STUDIES GEOINFORMATION
- REGULATION

ANM
www.gov.br/anm

CYCLE OF A MINING ENTERPRISE LEGAL MINING REGIME FOR ZINC (Decree Law Nº227/1967)

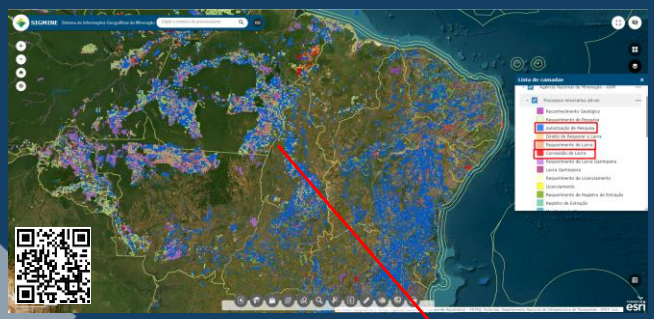
AUTHORISATION AND CONCESSION REGIMES

- **1st Step** Exploration Permit Request — Research stage aiming to discover a mineral deposit
- **2sd Step** Exploration Permit
- **3th Step** Approval of the Final Exploration Report
- **4th Mining** Concession Request — Feasibility study approval Assessment of the economic viability of the deposit
- **5th Mining** Concession — Mine development infrastructure implementation
- **Mining** Ore Extraction
- **Processing** Separation of ore minerals from gangue; separation of ore minerals into concentrates
- **Destination** Sending the product for consumption, transformation processes or to the buyer
- **6th Closure** Closing the mine according to planning and good practices

ANM
www.gov.br/anm

ANM - IMPORTANT MINERAL GEOSYTEMS

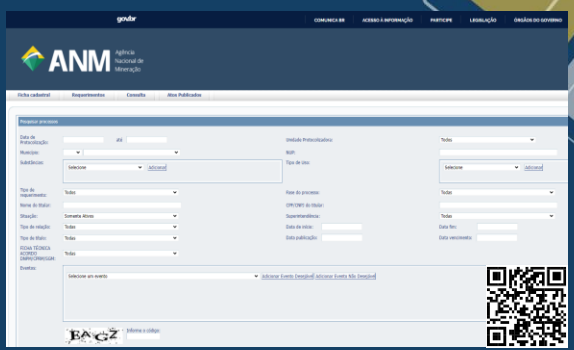
Sigmine System (Sistema SIGMINE)



Source: https://geo.anm.gov.br/portal/home/

- Geoinformation platform, where mining rights areas can be viewed, shapefile download, area restrictions (environmental, indigenous), river basins, infrastructure (roads, railways, energy transmisson and others).

Mining Registry System (Sistema Cadastro Mineiro)



Source: https://sistemas.anm.gov.br/SCM/Extra/site/admin/pesquisarProcessos.aspx

- System that allows you to search for information on mining rights by mineral exploitation regime, states, municipalities and mineral substances.

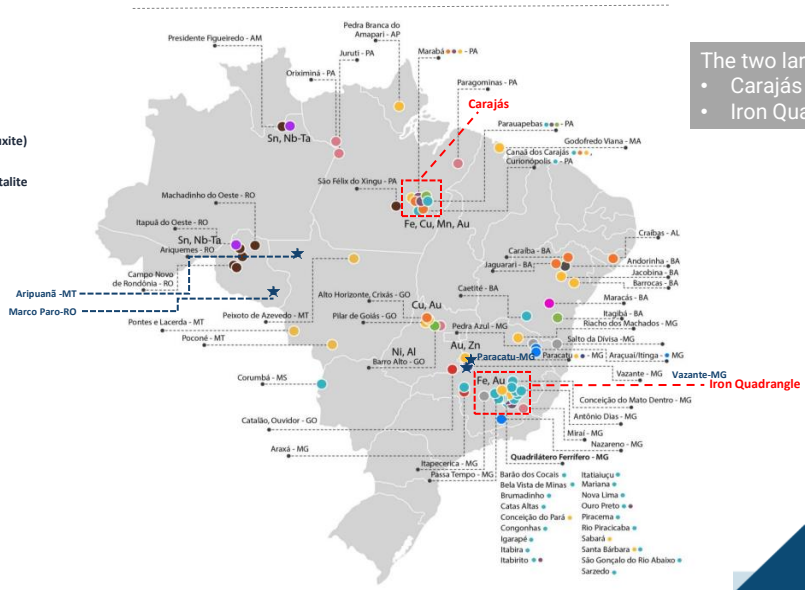
MAJOR MINES IN BRAZIL

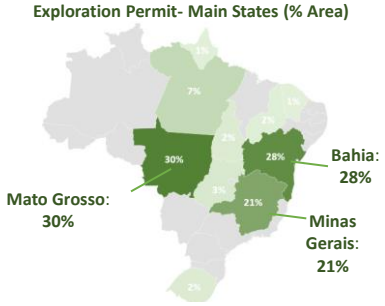
Aluminum (bauxite)
Copper
Columbite-Tantalite
Chromium
Tin
Iron
Graphite
Lithium
Manganese
Niobium
Nickel
Gold
Vanadium
Zinc



The two largest mining areas:
- Carajás (Pará)
- Iron Quadrangle (Minas Gerais)

MINING RIGHTS STATISTICS: EXPLOTATION PERMIT – ZINC 1998-2026

Exploration Permit- Main States (% Area)



Zinc Exploration Permit

- Quantity of active process: 1351
- Company Count: 155 (80% , 1 exploration permit)
- Area: 2,8 millions hectares (0,3% Brazil area)

Maximum area for exploration permit: 10,000ha in **Legal Amazonia** and **2,000ha** for **other locals**

Zinc - Exploration Permit:process quantity/ year

MAIN ZINC EXPLORATION PROJECTS IN BRAZIL (GREENFIELD)

Project / Mine Name	Company (Current / Historical)	State (UF)	Mineralization Type	Stage	Genetic Model	Mineral Resources	Resource Grades
Santa Helena (Cabaçal Belt)	Meridian Mining UK plc	MT	Cu, Au, Ag, Zn, Pb	Advanced Mineral Exploration / VMS Re-evaluation	VHMS (Volcanogenic Massive Sulfide)	Multiple stacked massive sulfide horizons discovered (2023-2026)	Intercepts with 3.4% to 7.6% Zn plus high Cu/Au/Ag
Bonsucesso	Nexa Resources S.A.	MG	Zn, Pb	feasibility study stage. (Retained in Morro Agudo M&A)	Carbonate-hosted Zn-Pb / Irish-type	Ind: 9.83 Mt; Inf: 3.38 Mt (S-K 1300 as of Dec 31, 2025)	Ind: 3.78% Zn, 0.51% Pb; Inf: 4.17% Zn, 0.52% Pb
Palma VMS	Alvo Minerals Limited	GO / TO	Zn, Cu, Pb	Mineral Exploration / Geophysics & Drilling	VHMS	Conductive anomalies and sulfide bodies along extended strike	Zn-Cu anomalies in soil and drill cores
Santa Maria (Caçapava do Sul)	Nexa Resources S.A.	RS	Pb, Zn, Cu	Exploration Project / Inactive Greenfield	SEDEX / Sandstone-hosted epigenetic	33.4 Mt (historical estimate)	1.44% Pb, 1.06% Zn
Lapão	CBPM (Bahia Mineral Research Company)	BA	Zn, Pb	Advanced Exploration / Irecê Target	Irish-type / MVT (Mississippi Valley-Type)	Drilling with mineralized intercept up to 19.7 m	Up to 12.7% combined Zn + Pb
Mundo Novo (Fazenda Coqueiro)	CBPM	BA	Zn, Pb, Cu	Exploration Project	VHMS (Paleoarchean)	Prospecting with relevant anomalies	Surface/drill sampling grades
Pojuca	Vale S.A. (ex-Docegeo)	PA	Cu, Zn	Delineated Deposit / Exploration	VHMS / Modified IOCG	58 Mt	0.9% Zn
Irecê	CBPM / Galvani	BA	Pb, Zn	Delineated Deposit / Exploration	Irish-type / MVT	1.5 Mt	7.9% Zn
Nova Redenção	CBPM	BA	Pb, Zn	Delineated Deposit / Exploration	Irish-type / MVT	2.5 Mt	0.5% Zn, 6.3% Pb
Salobro (Porteirinha)	CPRM	MG	Zn, Pb	Delineated Deposit / Exploration	SEDEX	8.29 Mt	7.12% Pb+Zn
Canoas	Mineração Boquira / Plumbum	PR	Zn, Pb	Delineated Deposit / Inactive	SEDEX / Metasomatic	0.367 Mt	3.82% Zn, 3.45% Pb
Seis Lagos Structure	CPRM	AM	Nb, REE, Zn, Pb, Ag	Exploration / Protected Occurrence	Carbonatite with supergene enrichment	Multi-commodity inferred resource	Zn, Nb, REE anomalies

***Nexa Resources: New Controlling Shareholder:** In August 2026, Votorantim agreed to sell its 64.68% controlling stake in Nexa Resources to Sweden's Boliden in an all-share deal worth about USD 1.31 billion. The deal covers Nexa's zinc assets in Brazil (the Vazante and Aripuanã mines and the Três Marias and Juiz de Fora smelters) and in Peru. Closing depends on shareholder and regulatory approvals and is expected in Q1 2027..

MAIN PROJECTS MINE ZINC IN BRAZIL (BROWNFIELD)

Project / Mine Name	Company (Current / Historical)	State (UF)	Mineraliz. Type	Stage	Genetic Model	Mineral Resources	Resource Grades
Aripuanã (Serra do Expedito)	Nexa Resources S.A.	MT	Zn, Pb, Cu, Ag, Au	Operating Underground Mine (Ramp-up completed June 2024)	VHMS / VMS (Volcanogenic Massive Sulfide)	M+I: 4.66 Mt; Inf: 43.78 Mt	M+I: 3.77% Zn, 0.19% Cu, 1.39% Pb; Inf: 3.02% Zn
Vazante (Complex)	Nexa Resources S.A.	MG	Zn (Pb, Ag)	Operating Mine (Underground / Open Pit)	Zn Silicate (Willemite) and Calamine	M+I: 2.46 Mt; Inf: 12.33 Mt (Mine) + 0.59 Mt (Aroeira)	M+I: 9.21% Zn, 0.14% Pb; Inf: 8.67% Zn
Morro Agudo	Casa Verde Holding Ltda.	MG	Zn, Pb	Operating Mine (Sold by Nexa in 2024)	Irish-type / Carbonate-hosted Zn-Pb (MVT)	18.3 Mt (historical total resources)	5.08% Zn, 1.75% Pb
Marcos Paro (Nova Brasilândia)	Mineração Santa Elina Indústria e Comércio S.A.	RO	Zn, Pb, Cu	Mine with historical production record	VHMS / Hydrothermal metamorphic	Record of historical zinc concentrate production	Commercial concentrate with ~41.4% Zn
